# Yira Villegas

Business Analyst, Process Improvement & Operations Optimization, BI & ERP (SAP BW, Power BI, SQL) KPIs, Workflows & Digital Transformation. Bilingual EN/ES
Baton Rouge, Louisiana, United States

## Summary

Bilingual Business Analyst and Process Improvement Leader with 15+ years of experience optimizing workflows, improving operational performance, and delivering data-driven solutions across banking, manufacturing, technology, and service industries. I specialize in transforming complex business needs into clear requirements, scalable processes, and actionable insights that support strategic decision-making. My background spans ERP/BI implementation (SAP BW, SAP SD, Power BI, Tableau, SQL), KPI development, process mapping, and cross-functional project execution. I've led initiatives that improved efficiency, reduced operational waste, enhanced customer experience, and increased profitability in high-volume and multi-stakeholder environments. I bring a unique combination of analytical capability, operational expertise, and business acumen, allowing me to collaborate effectively with product, engineering, operations, and executive teams. Whether supporting digital transformation, optimizing supply chain visibility, or improving service workflows, I focus on building solutions that are practical, scalable, and aligned with organizational goals. Core strengths include: • Business Analysis & Requirements Gathering • Process Optimization (Lean, Continuous Improvement) • KPI Reporting & Dashboard Development • ERP/BI Systems (SAP BW, SAP SD, Power BI, Tableau, SQL) • Cross-Functional Collaboration (Product, Ops, Engineering) • Customer Experience & Operational Excellence • Project Leadership & Change Management I am currently seeking remote Business Analyst, Operations Analyst, BI Analyst, or Process Improvement roles where I can contribute my experience to data-driven decision-making, operational efficiency, and scalable business solutions.

## Experience

IHOP

General Manager
March 2021 - Present (5 years 8 months)
Baton Rouge, Louisiana, United States

- Improved operational workflows and service processes, reducing peak-time wait from 60 to 25 minutes and significantly enhancing customer experience.
- Analyzed KPIs across labor, inventory, and sales to identify inefficiencies and implement data-driven improvements, increasing annual sales by 37% in the first year.
- Designed and executed process improvements that reduced waste and tightened cost controls, lowering A vs T variance from 6% to 2%.
- Led cross-functional initiatives to standardize procedures, strengthen team performance, and improve operational consistency across shifts.
- Built reporting routines and performance dashboards to support decision-making and operational visibility.
- Ranked Top 50 of 180 stores regionally for operational performance and customer satisfaction.

Lit Pizza
General Manager
February 2018 - January 2020 (2 years)
Baton Rouge, Louisiana, United States

- Improved operational KPIs across labor, inventory, and service quality through data-driven decision-making and workflow adjustments.
- Broke company records for sales per hour while maintaining high customer satisfaction.
- Supported the launch of a new store, ensuring operational readiness, team training, and process standardization.
- Strengthened team performance through coaching, clear KPIs, and structured procedures.

Banco Mercantil
Process Improvement Manager
April 2012 - February 2015 (2 years 11 months)
Caracas, Venezuela

- Led nationwide process improvement initiatives across 123 branches, increasing sales-time availability by 41% through workflow redesign and KPI-driven analysis.
- Defined business requirements and functional specifications for digital banking solutions, including the online account opening process.

- Partnered with IT, operations, and product teams to implement an internet banking enhancement stalled for eight years, completing delivery in six months.
- Developed KPI frameworks and operational dashboards that improved visibility, reduced client wait times, and strengthened decision-making.
- Conducted root-cause analysis, time studies, and process diagnostics to identify operational gaps and implement scalable improvements.
- Trained and mentored teams on process analysis, project execution, and continuous improvement methodologies.

### Alimentos Polar
Senior Business Analyst
May 2004 - February 2012 (7 years 10 months)
Caracas, Venezuela

- Led SAP BW implementations for sales, logistics, and operations, improving reporting accuracy and reducing analysis time for key performance indicators.
- Built BI tools and dashboards that enhanced operational visibility and supported executive decision-making across manufacturing and distribution.
- Developed and standardized process-based management systems, enabling continuous improvement across multiple departments.
- Collaborated with IT and business units to align operational needs with ERP capabilities, ensuring successful adoption of new reporting tools.
- Supported supply chain and logistics teams with KPI modeling, performance tracking, and workflow optimization.

### Global Markets C.A. Casa de Bolsa
Financial Analyst
March 2003 - February 2004 (1 year)
Maracaibo, Venezuela

- Organized and supported operations related to primary bond issuances, ensuring accurate documentation and compliance with regulatory requirements.
- Coordinated the opening of custody accounts in a U.S. financial institution for locally issued bonds, strengthening cross-border financial operations.
- Developed an in-house client stock management system to improve tracking, reporting, and operational efficiency.
- Provided financial advisory to clients, supporting investment decisions and portfolio management.

### PROLACTECA

Intern
March 2000 - May 2000 (3 months)
Maracaibo, Venezuela

- Developed a cost control system for the company’s highest-demand product, improving visibility of key cost drivers.
- Conducted a full analysis of the production process to identify the most relevant cost units and establish accurate pricing structures.
- Expanded the cost control methodology across all product lines, standardizing cost tracking and supporting more informed financial decisions.

Carmeron Venezolana
Intern
December 1999 - February 2000 (3 months)
Maracaibo, Venezuela

- Designed a Time Control Card to track labor and process time across assembly operations, improving cost allocation accuracy for individual work orders.
- Conducted workflow and time-study analysis to identify key cost components and integrate them into the tool.
- Achieved successful implementation after two prior unsuccessful attempts, standardizing time tracking and supporting data-driven cost management.

AIESEC Venezuela
Local President in Maracaibo
November 1998 - October 1999 (1 year)
Maracaibo

- Revitalized the local chapter and prevented its closure by rebuilding membership from 3 active members to a sustainable base that ensured four additional years of operations.
- Developed the Strategic Plan for the International Exchange Program, resulting in 9 successful traineeships and increased regional engagement.
- Co-designed a recruitment and training system that achieved a 75% member retention rate, strengthening organizational continuity.
- Built partnerships with regional stakeholders, including chambers of commerce and development-focused organizations, expanding visibility and support for the chapter.
- Led marketing and outreach initiatives, securing a partnership with a regional company that provided infrastructure, promotional space, and support for recruitment events.

PDVSA Petroleos de Venezuela S.A.
Intern
July 1997 - August 1998 (1 year 2 months)
Lagunillas

•Field Work “Developments in the Application of Multiphase Systems in wells with different Production Methods”.
•Analysis based on work with the Oil Production Simulators:  Flow System and PIPESIM for WINDOWS.
•Helped to evaluate the use of the technology on national scale
